Art Unit: 3652

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-32, drawn to a collapsible grappling hook, classified in class 294, subclass 87.1.
- II. Claims 33,34, drawn to a method of opening and closing a collapsible grappling hook, classified in class 294, subclass 1.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed can be used in a materially different process of using that product. For example the hook could be used with a method that uses the hook to climb with or a method that uses the step of engaging a detent to maintain the head in a position, etc.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Jeffrey Gargano on 6/14/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 3652

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
